This thread explores through an artist's eye the shocking drive to get every person on the planet injected multiple times with new experimental drugs for an alleged disease having virtually zero impact on kids yet many will receive shots whether they want this or not.

Big picture

Focus of my image is this group which I think of as a kind of 'Adoration of the Magi' but 3 recognisable characters all involved in dark magical pandemic arts witnessing a scene of ritual sacrifice involving a small child. A transformation is about to occur. Magi are in rapture.

Scene location was important. I liked the idea of a dark mountain top difficult of access. Searching, I came across a feature named 'Altar of Sacrifice' in Zion National Park, Utah. For the cartoon I adapted and dramatised this 'Peak V@cination' - the pinnacle of v@x \$cience.

A small parental figure is pictured offering up a child to the magicians who will inject the substances. There are many 000's of feet to ascend Peak V@x but a pathway has been prepared & parents willingly make the journey. Some are joyous to be serving the gods of the v@xzines

However, it must also be noted that some parents afterwards find their joy has turned into sorrow. The noble act of offering their beloved child to the higher cause of researching mRNA v@xzines has left them doubting the wisdom of their decision.

But in the perspective of such transformative events & opportunities being engineered by the magicians, sorrowful sacrifices will be ignored. The imperative to keep injecting the substances is like a mantra, repeated & repeated & repeated by V@xman

The magicians are separate but work together in unison towards the highest good for all of humanity - which can only be to get all ppl injected with the experimental substances. They are specialists in their respective fields. One here is a doctor & expert in health institutions

Yes, Dr. Fauci is also adamant about the need to have children - a group having little or nothing to fear from the magic virus - thoroughly injected. Despite multiple challenges from rational minds, the Fauci seems protected in his mission by a magic spell

The goat has some symbolic meaning. Goats are both sacrificial animals & in Christian religion "shed light on demonic forces, wicked men, and oppressors. In Christian theory, goats symbolise those unrepentant sinners who will not have a right to partake on judgment day."

Moving to cast of characters on the R.

During times of global crisis the world looks to the USA for leadership. On this occasion it gets ... Creepy Joe Biden and vaccine mandates. It's only about vaccination & expert \$cience ... when he's not distracted.

At times of national crisis there's also a pressing need to control the spread of dangerous misinformation because worship of the v@xzine magicians' expertise may not be questioned by mortals . Biden's surgeon general (in military dress) is onto the job.

#### Health Misinformation Reports and Publications

During the COVID-19 pandemic, people have been exposed to an abundance of information from a large number of sources.

<https://surgeongeneral.gov/healthmisinformation>

Anyway what could possibly go wrong when such an impressive array of trustworthy independent regulators and government health ministers have applied their collective scrutiny to the novel experimental injectable substances and pronounced them 100% fit for purpose?

Let's consider the regulators and start with Dr. Emer Cooke who left a position at WHO 4 years ago to become head of the European Medical Agency, the drugs watchdog organisation for the EU. It's all about 'beating Covid' with a "portfolio of v@xzines" !

On 21st Dec 2020 EMA gave a 'conditional marketing authorisation' (Emergency use only) for the Pfizer BioNTech genetic engineering based injectable substance for all people aged 16 & above after a 'rigorous evaluation' of the data.

<https://www.ema.europa.eu/en/news/ema-recommends-first-covid-19-vaccine-authorisation-eu>

What did other experts think about EMA's 'rigorous evaluation' of the data?

Even before EMA's authorisation, Prof Stefan Hockertz an experienced German pharmacologist and v@xzine expert voiced his doubts about the 'rigour' of Pfizer's toxicological data.

As a result of daring to question the v@xine magicians & their associates, the good prof Hockertz had to take a long break from public view (courtesy of the German thought police). More on this later, another researcher meanwhile had something to say about EMA's due process.

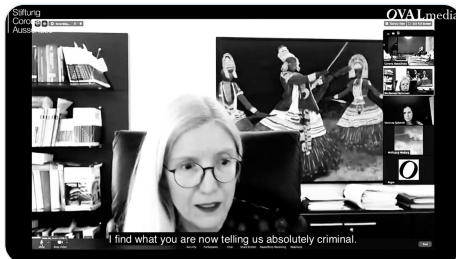

Dr. V Schmidt-Krüger is a cell biologist and researcher in cardiovascular disease. On Jan 29th 2021 she provided 2.5 hours of damning testimony to [@CoronaAusschuss](#) - her own assessment of the EMA authorisation process. This short extract is illustrative:

Another European regulator of interest is the UK's Medical & Healthcare products Regulatory Agency headed by June Raine, a pharmacologist. Is it possible that they also did a less-than-thorough job on the UK authorisation? I am not allowed to tell you that but you can check !

Gov. actors have been similarly enthusiastic about experiments on the population with the trans-genetic substances. In the UK, CSA Chris Whitty offers a confusingly different perspective to his Health Minister counterpart. Perhaps it's all part of the plan

**UK Gov. Vax safe & won't be used for kids - Mar 2021**

Matt Hancock & Chris Whitty giving different accounts of the use of vaccines and risks to the population. The Corona goalposts are fluid it seems. Is this misinformation?

<https://open.libry.com/@shortXXvids:e/Chris-Whitty-vaccines-are-safe:b?r=zeHvqA81g...>

But knowing the plan is difficult, due to secrecy around full ingredient listing of these EUA experimental shots. In the absence of manufacturer information, which you would expect for any other product, there is much speculation about weird structures seen under the microscope!

Various scientists/researchers incl. [@Ricardo93334602](#) [@DrJohnB2](#) [https://www.pathologie-konferenz.de/Tod\\_nach\\_COVID-19-Impfung\\_www\\_pathologie-konferenz\\_de.pdf](https://www.pathologie-konferenz.de/Tod_nach_COVID-19-Impfung_www_pathologie-konferenz_de.pdf) tried to assess the substances using microscopy & produced intriguing images but so far only speculation as to contents, so probably more useful to focus on actual adverse effects on people.

The process of adverse effects arising in people is a direct consequence of the action of doctors injecting the novel substances into bodies. We will consider the ethical

actions of doctors shortly, but first must not forget the role of the magician's wizard - The Angel of Death.

It's essential to know Germany's Christian Drosten provided essential wizardry for the whole fake pandemic & injectable substance scams to be perpetrated via his fake PCR test. The background on Drosten all here: [http://enformtk.u-aizu.ac.jp/howard/the\\_classified\\_drosten\\_files/](http://enformtk.u-aizu.ac.jp/howard/the_classified_drosten_files/)

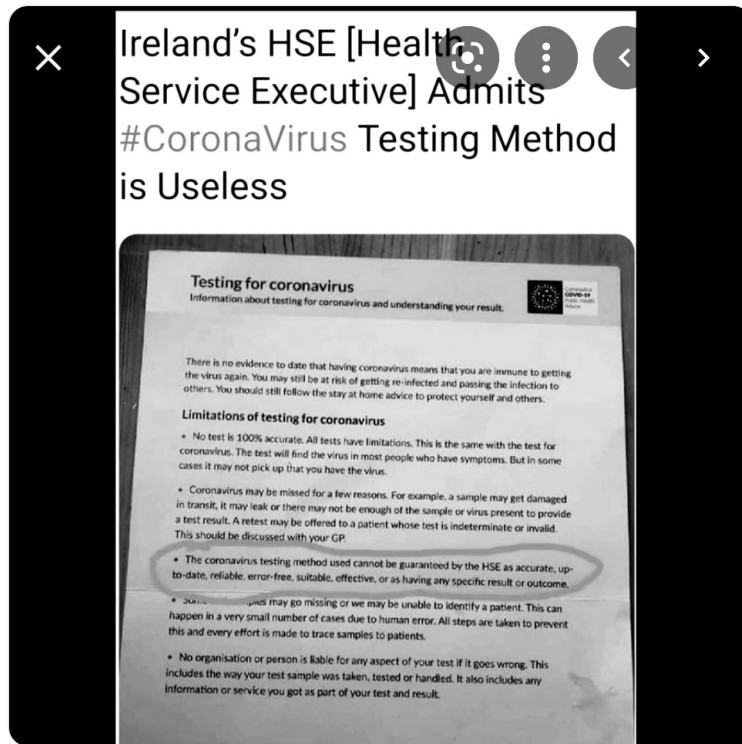

This man features in 5 of my cartoons.

Once understanding that:

1. PCR test cannot evidence infection (without doctor's diagnosis of symptoms)

2. PCR testing is used as a basis for assessing effectiveness of C-19 v@xines the whole pandemic lockdown, masks, asymptomatic transmission, vaccine nonsense breaks down.

I cannot explain this nonsense better than the good Swiss doctor, Thomas Binder - contributor along with 21 other science experts to the [cormandrostenreview.com](https://cormandrostenreview.com) exposure of the uselessness of Drosten's test & the crime of blanket PCR testing in general

Having heard from one good doctor, we arrive @ the v@xing image & doctors in general. Drs hold great respect from a public who fear for disease & expect healing treatments from Drs who have great power to do good - or not. For this reason they are bound to "First, do no harm"...

"Primum non nocere" is the Drs' Hippocratic oath. This would seem to be a self evident precautionary principle for safe practice of the art of doctoring. However, a significant group of Drs now feel the need to 're-new' this in the light of events Covid.

Btw, this main image of the power over life of the v@xxing doctor was inspired by an old painting which I initially took to be from the Dutch master Hieronymus Bosch, who in his time achieved a definite mastery in depictions of hell. It could be from one of his imitators however.

So doctors should operate to a professional ethical code to 'do no harm' & The Nuremberg Code provides a template & reminder of past disaster. But how many v@xxing doctors today are really aware of what they are injecting & what incentives can drive them?

Many medicines can produce serious side effects & therefore several developed countries have databases to log & flag serious adverse reactions. A US system set up by the CDC for vaccines is VAERS. It's actually a legal requirement for hospitals to report ARs to VAERS yet few do it

At my last check in [openvaers.com](https://openvaers.com) it showed >24,000 deaths following injections of the experimental trans-genetic substances. A whistleblower report provides shocking revelations of the reality on the ground in a large US hospital. After watching

this report it's not hard to understand why a Harvard study concluded that VAERS only captures about 1% of adverse events. Do the maths yourself to understand the scale of what is going on. And why, if ARs are so very rare do we see groups like [covidvaccinevictims.com](https://covidvaccinevictims.com) appearing?

The UK ARs are reported in the government 'Yellow Card' system. A helpful link from [@ukcolumnn](https://yellowcard.ukcolumnn.org/yellow-card-reports) presents this same data in a more user accessible way:

<https://yellowcard.ukcolumnn.org/yellow-card-reports>

But are the 1,698 UK deaths caused by the injected experimental trans-genetic substances. The fact checkers

would do our thinking for us and have us believe that these 'early warning' systems set up for that very purpose can't show causality. Strange really when the very same systems caused halt of the use of a Swine flu v@x in the US after a fraction of the ARs being seen today!

**REUTERS FACT CHECK** JULY 26, 2021 / 5:46 PM / UPDATED 3 MONTHS AGO

## Fact Check-Reports of 9,318 VAERS COVID-19 vaccine deaths do not prove causality

By Reuters Fact Check 3 MIN READ

Posts are sharing numbers reported to the U.S. Vaccine Adverse Event Reporting System (VAERS) as deaths following COVID-19 vaccinations and claiming that it proves the vaccines have killed people. This is false. Anyone can submit a report to VAERS. U.S. FDA advisers vote to recommend J&J COVID-19 vaccine booster for people 18 and older.

Meanwhile, in Israel the government does not need the paid-by-pharma fact checkers to guide the thoughts of those who cannot think for themselves - they (more efficiently) simply delete the data reported to their own system.
